

MANTLERHOF RIESLING KREMSTAL RIED STEINGRABEN 1^{er} OTW

Region	Soil	Elevation	Alcohol
Kremstal, Austria	Gravel, pebble, loess	200-255m	12.5%

Vineyard Steingraben: Located just above the village of Gedersdorf, it is steep and almost arched like a burning glass, but well ventilated by the west wind. Only here you find pure loess and conglomerate – eponym to its name. This soil is found only about 100 m wide. Colloquially Steingraben was called “Dürnsteiner”. The oldest mention is from 1276 called Tyernstainer, derived from “dry stone”. The wine from this Lage is juicy and lasting. Riesling selections of various origins (E100, Geisenheim 239, Trier 68, Jamek) and rootstocks (SO4, 5BB, R27, 5C) in order to have as much diversity as possible. Planted in 1996.

Grape Varieties Riesling

Vinification 2h maceration
Stainless steel

Age of Vines 30 years (1996)

Tasting Notes White meat, fish and shellfish would love to bathe in our Steingraben. Oysters and freshwater fish come to mind here. Also cuts a fine figure without food accompaniment and has a persistent drinking flow. Mature soft cheeses.
